

More about Superior Church Steeples:

- MOLDED IN POLYESTER GEL COAT finish specially designed for severe weathering conditions.
- MOLDED FIBERGLASS up to 1/4" thick laminated and reinforced for strength and durability.
- The many superior qualities of molded fiberglass have been adapted into QUALITY DESIGNED and RIGIDLY CONSTRUCTED steeples which will add distinction to any church. The beautiful porcelain-like finishes are not affected by extreme temperatures and are fully weatherproof.
- Our steeples can be mounted directly to the roof or can be adapted to fit an existing tower. All colors are molded in during the manufacturing process and provide a beautiful maintenance-free finish which will not stain the roof or tower even after years of weathering.
- Our steeples are shipped on our specially built trucks and trailers ready to be mounted on your roof or tower. Our highly skilled crews are available for economical installation.
- OUTSTANDING VALUE-more economical than other types of construction.
- Whatever your needs in fiberglass products for the church, we have the experience, personnel, and facilities to fill those requirements to your complete satisfaction
- EASY MOUNTING-with anchor plates molded in and precut to fit your roof pitch.
- LIGHTWEIGHT-so that no special reinforcing is needed in most applications
- BEAUTY-in a porcelain-like finish and a wide variety of designs.
- PROMPT SHIPMENT- to most areas on our special trucks, within four to six weeks of order.
- CHOICE OF COLORS-White (standard), other colors optional.
- CUSTOM DESIGNS-Our brochure illustrates some of the most popular combinations of the component parts we build. However, these components can be combined in other arrangements to produce different effects. E-mail and let us know your requirements. We will be glad to submit a combination tailored to your needs.
- TO AID IN YOUR SELECTION-To determine the size steeple for your church building, use a height approximately the same as the height from the ground level to the ridge of your building. Building style, design preference, and other special conditions must be taken into consideration in making your selection. Contact us so we can assist you in your selection. There is no obligation.
- LIGHTNING PROTECTION-Lightning protection can be added to steeple upon request. The aluminum wire will run from the top of the steeple to the bottom. The church is responsible for taking it to the outside and grounding it. Extra ground wire can also be purchased.
- KRINKLEGLASS -Krinkleglass can be added where louvers are shown.
- CROSSES-Crosses can be added to any steeple.
- WIND BRACING-Additional wind bracing MUST be added to all steeples installed within 50 miles of any coast.
- LIMITED STEEPLE MAINTENANCE –refurbishing and or minor touch ups and or removal to most states in the Southeast.

Additional Services Available:

- Protect Your Investment with Lightning Protection
- Louvers may be vented to accept a Bell or Carillon System
- Steeple Installation- Complete turn-key projects available in most Southeastern States
- Removal of existing steeple available
