

## **Baptistry Heater Installation**

Let us help you save up to 50% on your baptistry heater installation!

Did you know that some churches have paid in excess of \$ 1,200.00 for their heater installation on their beautiful new baptistry unit?

Here at Superior Church Furnishings, we care about your need to stay within your budget. Why not allow our factory installation specialist to install your new Hydro-Quip heating system for you?

Our installation charges include:

Mounting the heater to a special platform, drilling all necessary holes and connecting all necessary fittings to the baptistry, and if you elect to purchase the auto fill, it will be installed and connected at no additional charge.

For the drain portion, we will drill any necessary holes for easy assembly once your baptistry is in place, and if you elect to purchase the auto drain, we will temporarily assemble and check for proper operation.

Your new unit is easily turned on and off with push-button air switches that are mounted on the top surface of the baptistry. We then fill your baptistry and test run all heater components for a minimum of one hour to ensure proper operation.

When you receive your new baptistry, all you will need to do is connect your water supply, install drain components, and hook your power source to the main heater box.
